

Access Learning on the Mobile App

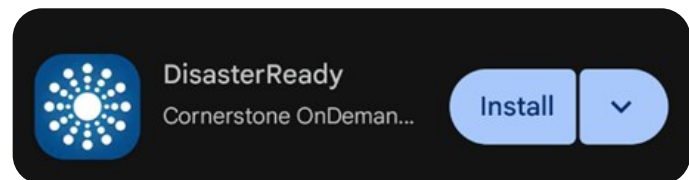

View content on your smartphone using the DisasterReady mobile app

Download the DisasterReady Mobile App

STEP 1: To access the DisasterReady mobile app, you must already have a DisasterReady account. Please first create your free account from the [DisasterReady.org](https://disasterready.org) website.

The screenshot shows the 'Create an account' page on disasterready.org. It includes fields for First Name, Last Name, Email Address, Location, and Gender. A note states: '(First and Last Name entered here will be the name displayed on course certificates)'. There are also links for 'Log in here' and 'Need help logging in or creating an account? Click here for password support and more.'

STEP 2: Download the DisasterReady Mobile App from the [Google Play Store](https://play.google.com/store/apps/details?id=com.disasterready) or the [Apple App Store](https://apps.apple.com/us/app/disasterready/id1444444444).

STEP 3: Click on the App on your phone.

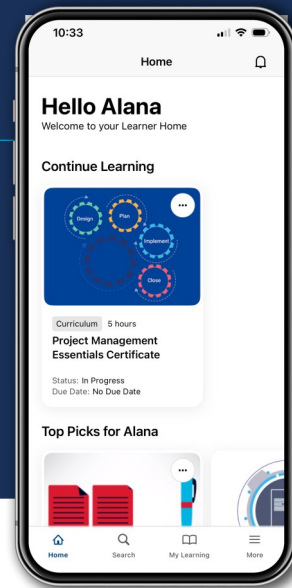

STEP 4: Log into the DisasterReady App by entering your email address and password for your DisasterReady account, then click on the **Arrow** icon.

The screenshot shows the 'Credentials' login screen in the DisasterReady app. It has fields for 'Username' and 'Password'. Below the fields is a red link that says 'Having trouble? Start over.' At the bottom right, there is a grey square button with a white right-pointing arrow, which is highlighted with a red square.

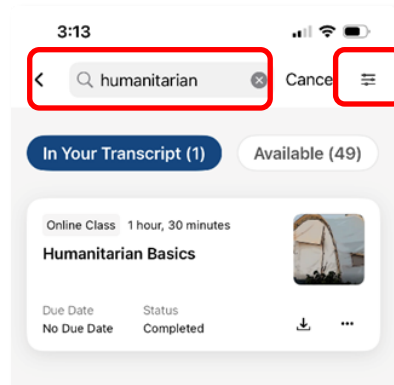

Use the DisasterReady Mobile App

From the app **Home** screen you can:

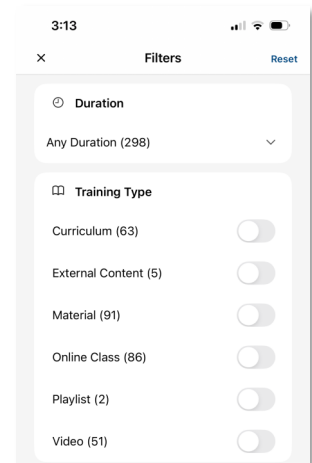

- Continue learning you have started
- Find recommend training from Top Picks
- Use Search to find training on a specific topic

Typing a keyword in the **Search** field finds In Progress or Completed training already on your Transcript as well as what is available in the DisasterReady catalog.

Click on the **Filters** icon to narrow the results by training type, subject, language, and more.

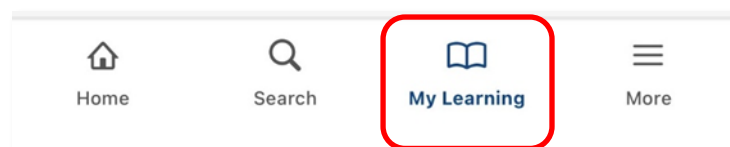

Launch

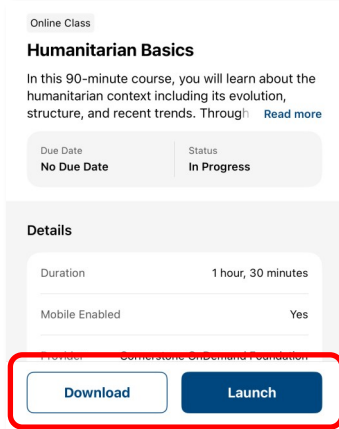

Request

Clicking on the training title allows you to **Launch** or **Request** the training.

Find training you have requested from the **My Learning** icon at the bottom of your screen.

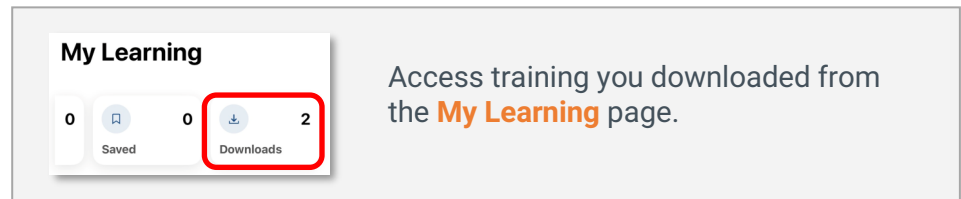

Take Learning Offline (when there is no internet access)

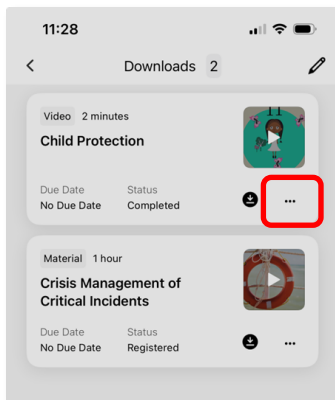

After using the mobile app to request an online course, material or video, click on the **Download** button.

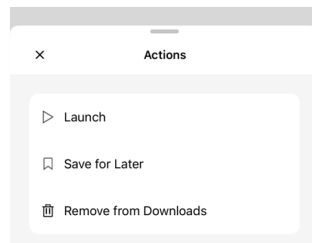

Once downloaded, you can click on **Launch**, to complete the course offline (without internet).

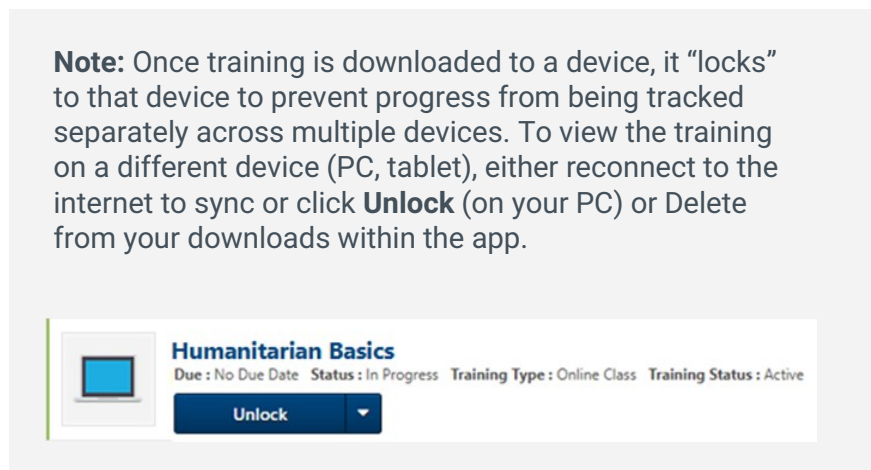

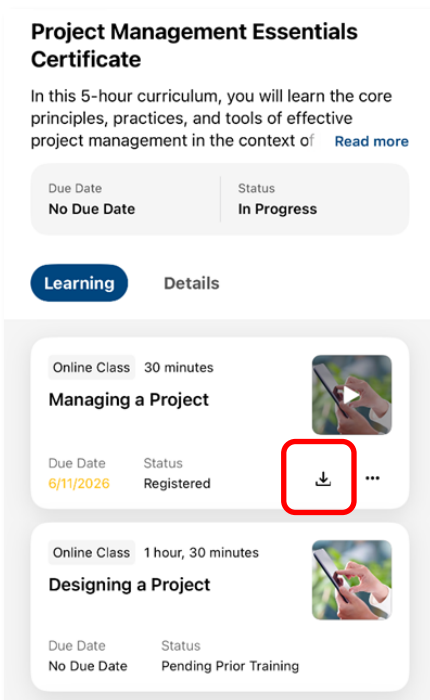

Access training you downloaded from the **My Learning** page.

From the **Downloads** screen, click on the **three dots** to launch or remove the download from your device.

When you have access to the internet, the course will automatically sync and save progress on the training you took and/or completed offline.

Note: Once training is downloaded to a device, it “locks” to that device to prevent progress from being tracked separately across multiple devices. To view the training on a different device (PC, tablet), either reconnect to the internet to sync or click **Unlock** (on your PC) or Delete from your downloads within the app.

For **curricula**, you must download the individual courses from within the curriculum.
